10 April 1959

To: Headquarters

Info:

25X1A

From:

Capstan motors for the Data Reduction equipment have not been reliable. The new vendor states that repaired units will be available approximately 20 April 1959. All units now in for repair will be returned to the depots by the end of May 1959.

The new vendor apologizes for the delay, but has claimed that the basic problem has been solved.

The first available units will be Type 631-1 motors.
